EXPERIENCE

Yanib — yanib.dev

2026 – Present

Co-founder

- Building the shipping layer for software teams: AI-drafted release notes generated from commits, QA-reviewed against the code, then published to GitHub, Slack, Discord and email.
- Launched March 2026. Member of the NVIDIA Inception program.

Fluid Commerce — fluid.app

May 2025 – Present

AI Software Engineer

- One of the first engineers on Fluid since 2021, when it was a client project at Danphe and the CTO was the only person writing code.
- Built large parts of the production multi-tenant social-commerce platform: the Liquid theme engine behind merchant storefronts, payments and subscriptions across Braintree and Stripe with VGS tokenization, the FairShare affiliate attribution system, and AI rep-outreach features.
- Brands running on the platform clear over \$1M in sales on peak days. Fluid raised \$15M in March 2026.

University of New Haven

Aug 2024 – Jan 2026

Research Assistant — West Haven, CT

- Deep representation learning on multi-compartment microbiome data; built the autoencoder framework behind the first-author publication below.
- Applied autoencoders and VAEs for dimensionality reduction across biological and e-commerce datasets.

Danphe Software Labs

May 2021 – May 2024

Senior Software Engineer — Kathmandu, Nepal

- Full-stack engineer (web, mobile, backend) building features for MLM commerce clients. Fluid was a client project here; I was one of the first engineers on it.
- Developed cyber-attack detection over high-volume data using SVM, CNN and RNN models with NLP techniques for entity recognition and text analysis.
- Built workplace-experience analytics driven by event-based questionnaires with metric dashboards.

PRODUCTS SHIPPED

Capsify — capsify.app

iOS & Android

Collaborative capsules of photos, places, notes and music, built with friends and sealed until an opening date.

Solmari — solmari.app

iOS

A private AI assistant running fully on-device: chat grounded in your own notes, semantic search and writing tools with no account, no server and no network calls. Runs Apple's on-device model alongside open models such as Gemma and Qwen.

OPEN SOURCE

react-native-local-llm — npm · [GitHub](https://github.com)

2026

Creator and maintainer. One interface for every on-device LLM runtime in React Native — Apple Foundation Models, ExecuTorch (Gemma) and llama.cpp-based Cactus — with device-aware model selection, unified token streaming and OOM guards. Extracted from Solmari's production inference layer.

A suite of AI-toolchain utilities: an in-memory test harness and matchers for MCP servers, context-window packing for chat history (shipped for both JavaScript and Python), and record/replay cache middleware for the Vercel AI SDK. All strictly typed, unit-tested and MIT-licensed on github.com/binaydhakal.

PUBLICATIONS

FIRST AUTHOR Integrating multi-compartment microbiome data with clinical parameters enhances mortality prediction using autoencoder.

Dhakal B, Savarapu LSK, Sayed K. *Journal of Microbiological Methods*, vol. 238, 107267, Nov 2025. DOI: [10.1016/j.mimet.2025.107267](https://doi.org/10.1016/j.mimet.2025.107267) · PMID 40972768

CO-AUTHOR Effects of Sudarshan Kriya Yoga (SKY) on the stress and self-esteem of medical doctors in a tertiary care hospital: a prospective analytical study.

Khadka B, Dhakal B, et al. *Annals of Medicine and Surgery*, vol. 86, pp. 4527–4531, Aug 2024. DOI: [10.1097/MS9.0000000000002289](https://doi.org/10.1097/MS9.0000000000002289)

EDUCATION

M.S. Data Science — University of New Haven, CT, USA Aug 2024 – Jan 2026
Artificial Intelligence, Machine Learning, Deep Learning, Bioinformatics, Natural Language Processing, Distributed and Scalable Data Engineering.

B.E. Computer Engineering — Paschimanchal Campus, IOE, Pokhara, Nepal Dec 2016 – Jan 2021
Tribhuvan University. Data Structures & Algorithms, Algorithm and Complexity, Software Engineering, Probability and Statistics, Machine Learning, Speech and Language Processing.

HONORS & AWARDS

Provost's Research Assistant Scholarship, University of New Haven — 75% tuition scholarship with paid stipend. 2024 – 2026

National Level Rubik's Cube Solver — Regional Champion, National 2nd, World Cube Association ([WCA profile](#)). 2018 – Present

Capture the Flag winner — member of the winning team, CTF competition organised by Paschimanchal Campus, IOE. Nov 2018

Tribhuvan University Merit Scholarship — awarded three times for the highest percentage in the Computer Engineering cohort. 2016 – 2021

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Ruby, R, C++, Solidity
ML & AI	PyTorch, TensorFlow, Scikit-learn, autoencoders & VAEs, transformers, LLMs, RAG, on-device inference, Pandas, NumPy, Jupyter
Web & Mobile	Ruby on Rails, React, React Native, Next.js, Node.js, Django, Liquid templating
Data	PostgreSQL, MySQL, MongoDB
Payments	Stripe, Braintree, VGS tokenization, subscription billing, in-app purchase
Infrastructure	AWS, Google Cloud, Docker, Git, Linux, Firebase, Heroku, App Store & Play Store release
